

STRENGTHENING ENGAGEMENT WITH HPC LEARNING SERIES

CORE SESSION 1: What and how to plan analysis and planning sessions in 2024 | 27TH of February, 2024

INTRODUCTION

The core session 1 of the learning series aims at presenting a unified timeline to **guide operations with regards to analysis and planning processes all along 2024, in preparation to the upcoming intersectoral 2025 HNO/HRP.**

Recognizing the difference in terms of resources and capacities across operations, the timeline is composed of core steps and suggested modalities, complemented by peer-to-peer events and bilateral support to field operations to adapt to available field resources and capacities, ensuring all possible efforts to have consultative processes for all expected deliverable. These key steps are meant to clarify to Protection clusters coordination teams how **Global Protection Updates (GPU), Protection Analysis Updates (PAU), and HNO/HRP** inform each other.
