E. Survey Results and Recommendations

The survey was designed to increase understanding of the current level of collaboration between Clusters, AoRs and other relevant entities towards four collective outcomes related to the prevention of and response to Explosive Ordnance Child Victims:

1. Prevention: Reduce the number of children who have an accident with an explosive ordnance;
2. Reduce Mortality: Increase the survival rate of child casualties through increased access to first aid, access to safe blood cold chains, trauma surgery, and ongoing medical care;
3. Increase personal capacity of child survivors through rehabilitation, as well as mental health & psycho-social support (MPHSS) of both child survivors and their caregivers;

The designations employed and the presentation of the material on this map do not imply the expression of any opinion on the part of the Global Education Cluster, Global Protection Cluster and PRO CAP, concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Data Source: Education, Protection, Health and Mine action clusters and AoR
Date created : 2/6/2020
Are there any data collection mechanisms (national or global) that capture data of relevance to children injured or at risk of being injured by EO?

Yes 71%
No 20%
Don't know 10%

Does your organisation, cluster, AoR share data with the system or systems listed above?

Yes 63%
No 25%
Don't know 13%

Is data disaggregated by all of the following: age, disability, gender, causes and types of injuries?

Yes 69%
No 25%
Don't know 6%

Is there a centralised database containing information on EO child victims, including their needs and services provided?

Yes 35%
No 35%
Don't know 29%

Are there any good practices (national or global level) demonstrating collaboration between the CP/MA AoRs and possibly other actors in the area of information/data management?

Yes 35%
No 29%
Don't know 36%

Which geographic area are you currently working in? All

Are there first aid providers in or in the vicinity of locations contaminated by EO?

- Yes: 50%
- No: 21%
- Don't know: 29%

Number of responses: 38

Do the first aid providers have the necessary equipment and means for a rapid and efficient response?

- Yes: 47%
- No: 32%
- Don't know: 21%

Number of responses: 36

Have MA/CP AoRs, health cluster members or other actors provided training to people and/or volunteers in affected communities on how to support casualties in the absence of professional treatment?

- Yes: 47%
- No: 32%
- Don't know: 21%

Number of responses: 38

Are any first response mechanisms incorporate cross-border/regional dimensions (for instance, medical evacuation)?

- Yes: 17%
- No: 47%
- Don't know: 36%

Number of responses: 36

Is the need for first aid or emergency response to child EO child casualties integrated into strategies of the health cluster, and/or health authorities?

- Yes: 39%
- No: 8%
- Don't know: 53%

Number of responses: 36

Are practices in Paediatric Blast Injury treatment documented and shared for research and learning?

- Yes: 65%
- No: 27%
- Don't know: 8%

Number of responses: 38

Are there any good practices demonstrating collaboration (national or global level) between the CP/MA AoRs, Health Cluster and possibly other actors in the area of reducing mortality?

- Yes: 41%
- No: 15%
- Don't know: 44%

Number of responses: 37

Which geographic area are you currently working in?

- All: 7 countries answered yes

Are the Case Management Standard Operating Procedures in place in health facilities to manage protection issues/risks being faced by beneficiaries/patients? 

- Yes: 38% 
- No: 9% 
- Don’t know: 53%

Is there an established mechanism (SOP) among service providers to facilitate referrals to services? 

- Yes: 43% 
- No: 27% 
- Don’t know: 27%

Is there an established mechanism, SOPs, or guidelines used among service providers on case management procedures? 

- Yes: 43% 
- No: 24% 
- Don’t know: 32%

Are there any good practices demonstrating collaboration (national or global level) between the CP/MA AoRs and possibly other actors in the area of case management? 

- Yes: 27% 
- No: 27% 
- Don’t know: 45%

Is there a functional referral system in place at primary, secondary and tertiary level healthcare in EO affected regions? 

- Yes: 38% 
- No: 26% 
- Don’t know: 36%

If yes, do they include provisions to register and manage cases of child EO survivors and indirect victims? 

- Yes: 45% 
- No: 18% 
- Don’t know: 36%

If yes, is it shared with EO survivors and indirect victims, including those living in remote areas in accessible format? 

- Yes: 38% 
- No: 29% 
- Don’t know: 33%

Is there a service mapping of all relevant services available? 

- Yes: 65% 
- No: 19% 
- Don’t know: 16%

Which geographic area are you currently working in? 

- All: 37 responses 
- 6 Countries answered yes
Prevention & Social Inclusion

If there is no strategy in place, what steps could the CP/MA AoRs and the Education Cluster take to establish one?

- Yes: 19
- No: 45%
- Don't know: 18%

Number of responses: 49

From 16 Countries

Prevention

Have the CP/MA AoRs and Education Cluster actors come together to jointly develop specific innovative risk education programs concerning children at risk from EO?

- Yes: 37%
- No: 45%
- Don't know: 18%

Number of responses: 50

Is there an inclusive EO clearance prioritisation process to which various humanitarian clusters and their members contribute?

- Yes: 24%
- No: 46%
- Don't know: 30%

Number of responses: 71

Are there any "good practices" demonstrating collaboration (national or global level) between the CP/MA AoRs, Education Cluster and possibly other actors in the area of prevention?

- Yes: 23%
- No: 77%
- Don't know: 30%

Number of responses: 50

Social Inclusion

Does the Education chapter in the HRP explicitly address and budget for the specific needs of EO child survivors and indirect victims?

- Yes: 6%
- No: 56%
- Don't know: 38%

Number of responses: 34

Are there inter-cluster efforts to coordinate and support awareness-raising activities to promote the participation and inclusion of child victims in social, cultural, political and other life domains?

- Yes: 43%
- No: 26%
- Don't know: 31%

Number of responses: 35

Is an intersectoral approach used systematically in policies and programs related to education, sports and cultural programs and policies (considering age, gender, disability, etc.)?

- Yes: 22%
- No: 33%
- Don't know: 44%

Number of responses: 36

Are there any good practices demonstrating collaboration (national or global level) between the CP/MA AoRs, Education Cluster and possibly other actors in the area of social inclusion?

- Yes: 30%
- No: 50%
- Don't know: 20%

Number of responses: 20

From 6 Countries
Integration of VA to the Response & Field Support

Integration of VA to the response

Are there inter-cluster efforts to ensure that the needs and rights of EO child survivors are effectively addressed?
- Yes: 41%
- No: 34%
- Don’t know: 24%

Does the humanitarian response plan (HRP) addresses the rights and needs of EO child survivors and children at risk?
- Yes: 61%
- No: 24%
- Don’t know: 15%

Is there a designated focal point (field or global) responsible to follow up the integration of assistance for EO child victims into the overall humanitarian response?
- No: 43%
- Yes: 38%
- Don’t know: 19%

Are there any good practices demonstrating collaboration (global or national level) between the CP/MA AoRs and possibly other actors that collectively address the needs of...
- Yes: 38%
- Don’t know: 33%
- No: 30%

Field Support

Has field support been requested for any of the above issues to strengthen the intervention?
- Yes: 24%
- No: 45%
- Don’t know: 30%

Was support received?
- Yes: 10%
- No: 30%
- Don’t know: 60%
