

Protection Cluster Meeting
Meeting minutes
10 April 2019

Protection/CP/GBV Minutes:

- It was noted that not all the protection cluster members were receiving emails on updates. Recirculation required and updating of [Protection Cluster Contact List](#).
- **Registration by WFP in collaboration with INGC** - WFP is planning to conduct a large scale registration exercise of the impacted population (~1.2 million) in two phases. The first phase is gathering mostly basic information (i.e., Name, Family size, Current Location, Origin of IDPs, and Possible Area of Return), while the second phase will look into a more in-depth understanding of vulnerability and needs. This exercise is conducted in collaboration with the government, and it could be tapped into by other sectors/partners. Discussions are still underway on the process with protection MFT who are strongly advocating the use of the current INGC form whose data sets would greatly support resource mobilization assistance.
- **MFT team assisted INGC to enhance data pertaining to affected population at Eduardo and Mutemba.** This data was to be further aggregated at Samora Machel; transfer location.
- A meeting took place with the Directorate of women, children and social action to discuss implementation of the "protection desks" at camp level. IOM is coordinating with the Government and at camp level.
- A task force has been set up with IOM, UNICEF, UNFPA and UNHCR concerning the "protection desks" to be set up in each of the 6 camps. The objective is to have an integrated approach with CP and GBV actors and ensure that any protection response at camp level is embedded into government mechanisms and channelled through Police officers, Health focal points and social workers already present in most of the camps. Protection desk at Picoco is currently being piloted, IOM will lead the coordination and ensure these protection desks are in place and functional in each camp.
- Similarly, a need to identify spaces where the erection of protection desks would be done was raised. An MFT was to visit the sites on Thursday morning to assess and revert.
- It was also reported that the social workers who would potentially man the protection desks lacked mobile phones. They were also sceptical in sharing their personal numbers.
- A request to also provide drinking water to this group was made.
- GBV sub-cluster raised the need to work on GBV awareness raising and messages to be disseminated: via radio, which languages, etc. Communication with Communities (CWC) has been approached by the GBV sub-cluster for collaboration
- Request to determine protection interventions provided by local organisations was raised.
- A column to be added on the 4W sheet that indicates location of intervention/site.
- To ensure that the current referral pathway meets protection clusters identification, reporting and management of incident needs, there was a request for GBV and CP to further look at it and present to the meeting the agreed referral system.
- GBV braining storming meetings begun on assistance to be accorded in and out of camp. Planning on information dissemination – use of theatre

- The CP AoR under the leadership of UNICEF have supported the relocation process this morning (379 Families) from Eduardo Mondiani and Sansao Mutemba to Samora Machel relocation site; set up of Child friendly space is ongoing.
- FTR working on going Save the children conducted registration of UASC in Dondo and Namathanda locations.
- FTR data for Beira sites being compiled, following up on 12 urgent cases, UASC and SGBV
- Assessment trip to Buzi- 35 CFS planned to be set up in collaboration with Como Sana (sites TBC)

Meeting with INGC Ass. SG

- The Ass. SG reiterated appreciation by the government to humanitarian actors for humanitarian support accorded so far.
- The high numbers of return requests by affected population accommodated in centers and schools is impressive as it shows the will to return and rebuild their lives.
- A need to clean up and reconstruct felt. Gap: funding. She confirmed that she will advocate for additional funding.

Update by Head of Humanitarian - Sebastian

- There is a need to move from a daily planning approach to a multi planning approach.
- It was also noted that funding is slowly dwindling, as such, the next 20 days should be used to optimize interventions as the situation may also move from an emergency phase.
