HOT TOPICS AND QUESTIONS OF THE MOMENT

- How to address the needs of most vulnerable households during winter?
- Should the CVA assistance still be limited to three months?
- Closure of community centres - how to ensure a protective shelter and environment for families?
- How can agencies best support foster families with CVA?
- What would the implications be of setting more restrictive selection criteria for cash assistance?
- How to estimate the value of protection top-ups in CVA calculations?
- How to mitigate existing/future protection risks associated with lack of available and affordable shelter options?
- How to set up referral mechanisms between CVA and Protection teams that are safe from a data protection perspective?
- What type of information on children should and should not be collected at registration stage, considering data protection risks? (Ex: birth certificates)
- Are the amounts made available to Ukrainian refugees as part of national protection schemes sufficient to meet their basic and protection needs?

IOM - Area Baseline Assessment: Ukraine - Round 13 – October 2022 (link)

OHCR - Report on the human rights situation in Ukraine – September 2022 (link)
DFS, REACH - Ukrainian Crisis - Situational Analysis - September 2022 (link)

REACH - Ukraine Arrival and Transit Monitoring - September 2022 (link)
In total, 2,797 household interviews were completed between 25 July and 5 August 2022 at transit centres, collective sites, administrative and humanitarian centres.
- In most locations, HHs depended on humanitarian aid and government social assistance. In Lviv, most HHs relied on employment income, whereas 42% of HHs in Zaporizhizha reported no income.
- 78% of assessed HHs reported that at least one HH member had a vulnerability, most commonly children (0-17 yrs) and older persons (65+ yrs).

REACH - Ukraine: Humanitarian Situation Monitoring - September 2022 (link)
1658 phone interviews with Key Informants in 306 settlements
- In most of the cases in assessed GCA settlements, humanitarian assistance reportedly did not help to meet the immediate needs of the population or helped to a limited extent.
- Food and medicine were identified by interviewees as the most useful types of humanitarian assistance in the assessed settlements in both GCAs and recently liberated areas.
- Interviewees generally reported some level of perceived awareness among people about procedures and referral pathways to report protection issues (such as sexual exploitation and abuse (SEA), gender-based violence (GBV), human trafficking, etc.), and the police or law enforcement bodies were most frequently cited as relevant bodies to report such cases to.

CCCM Cluster, REACH, UNHCR - Collective Site Monitoring (CSM) survey, Ukraine - Round 3: August–September 2022 (link)
Out of 1,397 assessed sites, 1,071 were actively hosting IDPs while 326 were empty but ready to host them. 60,278 Individuals were reportedly staying in the assessed collective sites on the day of data collection; with 122,392 reported places as overall capacity of monitored sites.
- 55% of the CSs reported having a referral system in place through which persons at risk or affected by protection concerns can seek support.
Food products (71%), hygiene items (44%) and sleeping items (22%) remain the most frequent type of aid the CSs reportedly received.
- Older adults, female-headed households, and people with serious medical conditions are reportedly the most frequent vulnerable populations present at the CSs. Forty-one percent of the CSs reported concerns about the site’s heating during upcoming winter.
- 54% of the CSs declared not receiving humanitarian assistance in the last 14 days prior to the data collection, pointing to continuous deficit of it

Sub-national / Area-based assessments

ACAPS Thematic Report - Ukraine: Humanitarian situation in newly accessible areas of Kharkiv oblast - October 2022 (link)
This report aims to provide an overview of the humanitarian situation in the areas of Kharkiv where Ukrainian forces regained control in September 2022, meaning areas accessible again to the humanitarian community. The report highlights critical needs and information gaps in these areas.

REACH - Area-based assessment: Dnipropetrovska Oblast - August 2022 (link)
1,304 household surveys (HHS), mapping of local response actors (LRAs) and 8 focus group discussions with local response actors (LRA-FGDs)
- Most reported needs by households overall are economic assistance (54%), food (48%) and employment support (48%). IDP households reported additional needs such as long-term displacement solutions (43%), but overall non-displaced households reported similar needs, and sometimes an even larger proportion reported needs in essential areas such as healthcare (31% versus 24% for IDPs) and WASH (10%, versus 4% for IDPs).
- IDP households living in collective sites tend to be more vulnerable than IDP households out of collective sites, and non-displaced households.
- The international response remains more focused on Dnipro city compared to other parts of the oblast.
- Conflict-affected hromadas are in strong need of early recovery support to cope with the impact of shellings on infrastructure, energy and water facilities.

Non Violent Peace force - Kharkiv snapshot: Civilian protection needs & responses in Ukraine - September 2022 Update (link)

RCRC, URCS- Ukraine: Livelihoods Situation Assessment Report - August 2022 (link)

Samaritan's Purse - Rapid Survey of Recently Liberated Areas in Ukraine -October 2022 (link) 80% of respondents listed food as their most pressing needs; 50% listed medicine as their second most pressing need; and 23% listed winter items.

Lack of resources to leave
Do not want to leave family behind
It is not safe to leave
Due to health issue or a disability

Out of 3,849 submissions, the most commonly reported reasons why the population cannot leave were:

- Lack of resources to leave: 179
- Do not want to leave family behind: 163
- It is not safe to leave: 136
- Due to health issue or a disability: 133

13% of refugee respondents across all countries report plans to return permanently to Ukraine in the next three months.

88% of those refugees who report no intention to return or who are undecided on whether or not to return in the next three months indicate safety and security concerns in places of origin as the main impediment, and 31% are also concerned about the lack of work or livelihoods opportunities.

Key figures:
- Displacement intentions

General response updates
UNHCR – Recalibration – Regional Refugee Response Plan - October 2022 (link)
Under the recalibration exercise, RRP partners have prioritized additional cash, protection, and education activities to address emerging and increased needs foreseen in the coming months.

Accordingly, cash assistance is a priority among RRP partners to support the most vulnerable individuals’ expenses for rent, heating and electricity, clothing, and other basic needs. Distribution of essential relief items and winterization kits to newly arriving refugees and those identified as in need in the country will complement cash-based interventions, while counseling on access to social protection and services will be further enhanced.

New assessments & guidance
Refugees International - Preparing for the unpredictable: Ensuring the protection and inclusion of refugees from Ukraine in Romania and Moldova – October 2022 (link)
Both Romania and Moldova require significant financial and technical support to immediately welcome refugees from Ukraine and accommodate them in the mid- to longer-term. Already, various obstacles hinder refugees’ ability to exercise their rights and to access services for which they are eligible.
- Furthermore, as Romanian and Moldovan citizens grow increasingly concerned about the war’s enduring implications on their own economies, the initial welcome the Ukrainian refugees received is wearing thin.
- To date, commitments from Romanian, Moldovan, and EU officials to realize refugees’ inclusion remain clearer in rhetoric than in action.

UN Agencies and international non-governmental organizations should:
- Improve cooperation and empower local civil society organizations (CSOs) in the response.
- Regularly engage refugees wherever they are to ensure far-reaching information provision and representative, accurate data collection. Continue prioritizing GBV prevention, mitigation, and response and counter-trafficking measures.
- Streamline and strengthen reporting and referral mechanisms to better support survivors of GBV and trafficking.

Key updates relevant to CVA & protection in Moldova

**Operational updates**

- OCHA - New winterization campaign dashboard ([link](#))
- OCHA - Operation data portal – interactive dashboards ([link](#))
- UNHCR - Operational data portal – Moldova ([link](#))
- Moldova Operations Update - Ukraine Refugee Situation - September 2022 ([link](#))

91,772 Ukrainian refugees remaining in Moldova, 60% female.

**UNHCR – Recalibration – Regional Refugee Response Plan - October 2022 ([link](#))**

The war in Ukraine threatens Moldova’s short-term recovery and long-term economic prospects. Now, burdened with the highest inflation rate in Europe and skyrocketing energy prices, the country faces a challenging winter season ahead.

**UNHCR – RRP Moldova: Inter-Agency Winterization Plan (November 2022 to March 2023) – October 2022 ([link](#))**

This plan serves as a preparedness and response guide for partners when implementing winter related activities at the local level, and it outlines key humanitarian activities with the main focus on life saving winter support in line with findings from the Winterization Rapid Needs Assessment ([link](#)) and consultations held with both refugees and host community members.

The plan prioritizes activities delivered through multiple modalities, including winter cash support in line with government winter response, critical winterization repairs, provision of winter related items, support to Refugee Accommodation Centres, among others.

**UNHCR - Regional Inter-Agency Operational Update - Ukraine Refugee Situation - 1 to 31 August 2022 ([link](#))**

---

**CVA:**

**Ukraine Situation - Moldova: Cash assistance for refugees - September 2022 ([link](#))**

Post-Distribution Monitoring of UNHCR’s Cash Assistance in Moldova - Round 2, July 2022 ([link](#))

Overall, results from the second round of monitoring highlight that cash assistance remains well adapted to the context, it was easy to spend in the local markets and on services and cash remains the preferred modality of assistance.

- Cash assistance was most frequently reported to be used to cover for basic needs, such as food (as reported by 92% of households), health expenses (56%), utilities and bills (52%), clothes/shoes (31%) and rent (25%).
- Results show that needs among beneficiary refugees remain high, with 80% of households having reported that, at the time of the assessment, they were able to meet only half or less of their basic needs.
- Besides, the vast majority (86% of beneficiary households) reported that they had used at least one negative livelihood coping strategy in the 30 days prior to data collection.
- 88% Used some of their savings to meet their basic needs; 58% Reduce expenses on health (including drugs) and education to meet household needs; 54% Reduce expenditure on hygiene items, water, baby items in order to meet household food needs.
Key updates relevant to CVA & protection in Moldova

Protection:
Gvt. of Moldova, UNHCR - Ukraine Situation - Moldova: Protection Working Group Meeting Minutes - 07 Sept 2022 (link) and 24 Aug. 2022 (link)

GBV:
UN women, UNHCR - Ukraine situation: Moldova: Gender Task Force Meeting Minutes - Sept. 2022 – (link) previous minutes (link)
UNHCR - Moldova: Gender-Based Violence Sub-Working Group Update #05 - Reporting period: July and August 2022 – Sept. 2022 (link)
- Risks of GBV are related to unsafe conditions in certain contexts, reduced ability to meet basic needs, separation from protective networks, and limited access to protection support.
- Several risk reduction actions have been achieved in Moldova through coordination among humanitarian response actors. These include increased security measures at border points, the provision of humanitarian transportation, the wide inclusion of groups at risk of GBV in multi-purpose cash assistance interventions, and the management of refugee accommodation centres by predominantly women social services workers.
UNFPA, UNHCR - Rapid GBV Risk Assessment in CVA (Moldova) – October 2022 (link)
The outcome of this joint activity echoes the findings of the GBV safety audit, which highlights the importance of concrete actions to ensure that CVA does not trigger or exacerbate GBV risks.
This highlights the growing recognition that basic CVA risk analysis alone is not enough and that a specific GBV and gender lens must be applied. Finally, the findings of this joint activity should be seen as a useful starting point for an action planning session where both GBV and Cash actors can agree on next steps, including which mitigation activities should be implemented moving forward.

HelpAge - Moldova: Needs Assessment of Older Ukrainian Refugees - September 2022 (link)
485 older people interviewed.
- Cash assistance is the preferred modality amongst older refugees, therefore this support should be expanded and sustained .
- 82% of older people interviewed had at least one health condition, with 51% having more than one. 32% of those interviewed with a health condition reported they could fully access their medication. The key reasons given were cost, non-availability of medication is unavailable, followed by difficulty accessing the local market
- 97% of older refugees also reported that cash would be safe to use. Regarding the preferred transfer modality 71% of older people preferred bank cards, while 25% preferred cash in hand (especially those over 70).

Key updates relevant to CVA & protection in Bulgaria

### Funding environment

**UNHCR – 2022 funding update** (link) UNHCR's financial requirements 2022 - $19,9 million - 70% funded.

### General updates

**UNHCR – Recalibration – Regional Refugee Response Plan** - October 2022 (link)
By 13 September, more than 674,000 refugees from Ukraine had arrived in Bulgaria since February 2022. In the past weeks, a large number have departed and to date, some 67,000 currently remain in the country, most of whom reside in the coastal area. The national accommodation policy, which currently benefits some 18,000 people, is scheduled to end by 31 October 2022 and it remains uncertain whether the stay of the most vulnerable refugees will be extended beyond this date in state-owned accommodation. Furthermore, a care-taker government has been in place in Bulgaria since a 22 June no-confidence vote in the previous administration.

A Task Force and six sectoral Working Groups established under the previous administration to manage the national response to the Ukraine situation have also consequently been dissolved, with the resulting lack of a clearly designated government interlocuter for managing the response adding to operational challenges.

### Achievements

A cash-for-protection programme was launched in August 2022 for the provision of one-time assistance to the most vulnerable refugees with heightened protection risks. Some 25,000 refugees are targeted under this programme through the end of the year.

**Ukraine Refugee Situation Operational Update – Bulgaria** – August 2022 (link)
UNHCR has scaled up its protection and monitoring activities together with UNICEF and other partners by opening its sixth Blue Dot on 14 July in Varna. Together, UNICEF and UNHCR have already opened such centres in the cities of Sofia and Burgas as well as in Ruse and Durankulak at the Bulgarian-Romanian border, all of which host large numbers of Ukrainian refugees.

Collectively, 11,710 people have received protection support through the Blue Dots initiative from its inception on 9 May to the end of July 2022.

**European Union Agency for Asylum: EUAA deploys to Bulgaria as over 530,000 Ukrainians enter the country** – September 2022 (link)
The signing of the Operating Plan comes as over 130,000 of those who have fled the invasion of Ukraine have already registered for temporary protection while the number of asylum applications has tripled. The EUAA is expected to start deploying up to 15 personnel and interpreters to Bulgaria.
