Purpose of this factsheet:

This Factsheet is produced on a monthly basis for Protection and Cash and Voucher Assistance (CVA) specialists who are considering, planning for, or already using CVA integrated into protection programming to support protection outcomes for individuals and households inside and outside of Ukraine. Key findings are paired with “hints” wherever possible based on the current state of information and best practice resources on how CVA for Protection can be applied.

This factsheet aims at addressing Cash for Protection broadly and relies on the key information provided by the Task Team members as well as the relevant clusters, AoRs and working groups. All previous factsheets are available via this link.

HOT TOPICS AND QUESTIONS OF THE MOMENT

- How to address the needs of most vulnerable households during winter?
- Should the CVA assistance still be limited to three months?
- Closure of community centres - how to ensure a protective shelter and environment for families?
- How can agencies best support foster families with CVA?
- What would the implications be of setting more restrictive selection criteria for cash assistance?
- How to estimate the value of protection top-ups in CVA calculations?
- How to mitigate existing/future protection risks associated with lack of available and affordable shelter options?
- How to set up referral mechanisms between CVA and Protection teams that are safe from a data protection perspective?
- What type of information on children should and should not be collected at registration stage, considering data protection risks? (Ex: birth certificates)
- Are the amounts made available to Ukrainian refugees as part of national protection schemes sufficient to meet their basic and protection needs?

CVA
OCHA SITREP (link) - There is a need to assess further market functionality in the areas of Khersonska oblast retaken by the Government of Ukraine to determine if MPS is the most feasible response option. The Cash Working Group has started mobilizing partners to conduct this exercise.
UNHCR- Ukraine cash assistance factsheet – November 2022 (link)
791,023 IDPs and conflict affected people have received assistance through disbursement of cash, including 211,844 with winter cash assistance - US $153.1 million disbursed so far to assist IDPs and other conflict affected people

Protection
OCHA SITREP (link) - There is a risk that internally displaced people will be cut off from assistance due to the place of residence verification process initiated following the adoption of amendments to Resolution (332) on the registration of IDPs by the Government of Ukraine. Those relocated from collective centres but registered there are most at risk of being affected. Humanitarian partners are advocating with the authorities to solve the challenges and assure assistance to all people in need.

**UNHCR - Multi-purpose cash assistance: Post Distribution Monitoring Report** - November 2022 ([link](#))

- **Within the reporting period** 153,641 households (372,525 persons of concern (PoC) have been reached with MPCA; and 417 beneficiary HHs were interviewed for the PDM.
- 86% of HHs reported that MPCA enabled them to cover all or most of their priority needs.
- 93% reported spending cash assistance on food, 52% reported spending on rent, and 47% spent on hygiene items.
- 98% of Households reported improved living conditions
- 94% were able to find the needed items on the market and with the required quality (97%). However, 61% reported increased prices of purchased items (mainly with reference to food and rent).
- 61% of beneficiaries needed to resort to one or more harmful coping strategies in the four weeks preceding the interview to cover their most pressing needs. The most frequently adopted strategy was reducing expenditure on hygiene items, water, baby items, health, or education

- Besides humanitarian cash assistance, 45% of households receive cash assistance from the government. Another major source of income is pensions, received by 28% of the respondents. More than a third of the respondents (36%) used their savings to meet their basic needs.
Key updates continued - Ukraine

ACTED, OCHA, REACH - Ukraine: Joint Market Monitoring Initiative (JMMI) - published in November 2022 (link)
- 41% of retailers reporting difficulties keeping store operational and well-stocked
- 83% of respondents indicated that they did not have any difficulties with access to banking institutions;
- 87% of respondents indicated that they had no difficulties using payment terminals;
- 84% of respondents indicated that Ukrposhta delivered cash on time and every month.
- Rental prices for one-bedroom apartments in Ukraine continued to rise

General/multisectorial assessments
ACAPS - Thematic Report - Humanitarian access analysis - October 2022 (link) See overall map page 20

CCCM Cluster, REACH, UNHCR - Ukraine: Collective Site Monitoring (CSM), Comparative Analysis Brief – November 2022 (link)
- Over the three rounds, KIs reported a prevalent proportion of female elderly as the most numerous vulnerable group. Elderly and persons with disabilities in sites are likely to face additional protection concerns due to infrastructure limitations, particularly due to a lack of disability-friendly devices
- A high proportion of sites assessed from June to September reportedly did not have a referral system for supporting IDP residents in case of protection risks or concerns (28% in Round 1 and 33% in Round 3).
- 46% of KIs reported a lack of reporting system for gender-based violence (GBV) and trafficking.

REACH - Ukraine Arrival and Transit Monitoring - October 2022 (link)
In total, 2,807 household interviews were completed, HHs arriving and transiting through 9 Internally Displaced Persons (IDPs) transit hubs across Ukraine
- Most HHs reported intending to remain in Ukraine. Pull factors included the presence of family/friends and perception of safety.
- In most locations, HHs depended on humanitarian aid and government social assistance, with 30% of HHs in Zaporizhzhia reporting no income.
- Across all transit hubs, multipurpose cash was one of the most commonly reported needs of HHs.
- 78% of assessed HHs reported that at least one HH member had a vulnerability, most commonly children (0-17 years) and older persons (65+ years).
- REACH data shows that across all transit hubs the vast majority of HHs were not able to meet their everyday needs, as only 5% of HHs reported always being able to do so.

REACH - Ukraine: Cold Spot Risk Assessment Winterization 2022/23, Factsheet - November 2022 (link)
- Raions with highest Cold Spot Index (CSI): Bohodukhivskyi (CSI = 4.8) - Kharkivskyi (CSI = 4.8) - Chuhuivskyi (CSI = 4.8)

USAID - Results of National Survey on Vulnerable Population Needs – November 2022 (link, link)
A telephone survey in different regions of Ukraine in August 2022. A total of 1,000 women and men aged 16 to 60+
- 39% of the population belong to at least one vulnerable group
- One in five respondents is forced to save on groceries or borrow to buy something other than food (telephone, furniture).
- 14% of respondents encountered cases of gender-based or domestic violence since February 24, 3% of them personally or among family members. Half of them (51%) appealed to the state authorities about this issue.
- Almost half – 45% of people – responded that they do not have access to the Internet or a computer and cannot study or work online.

Key updates continued - Ukraine

CCCM Cluster, REACH, UNHCR - Ukraine: Proportion of sites that reported receiving humanitarian assistance during the October round of CSM (link); as well as Most urgent needs according to the site managers (link) – November 2022

IOM - Area Baseline Assessment: Ukraine - Round 16 (link) and Round 15 (link) - November 2022

CDAC, Snapshot report: The state of communication, community engagement and accountability across the Ukraine response – October 2022 (link)
There remain urgent information needs, increasingly on cash assistance and topics related to support for longer-term integration of refugees. There is a particular gap in information provision in Russian and Romani dialects. In response to the identified preferences of affected people, digital communication and social media have been prioritised – but these have primarily been used as one-way methods of communication and two-way digital outreach is still lacking.

Data Friendly Space - Ukrainian Crisis - Analysis Brief: Humanitarian conditions for older people in conflict affected Ukraine - November 2022 (link)
(Secondary data review)

Amnesty - "Like a Prison Convoy": Russia’s Unlawful Transfer of Civilians in Ukraine and Abuses During ‘Filtration’ - November 2022 (link)
The report details how Russian and Russian-controlled forces forcibly transferred civilians from occupied Ukraine further into Russian-controlled areas or into Russia. Children have been separated from their families during the process, in violation of international humanitarian law.

Oxfam - Six months after the Russian invasion: Oxfam's humanitarian response to the war in Ukraine – November 2022 (link)

World Bank - Ukraine 2012–20: Country Program Evaluation (link)

PwDs

HelpAge, Protection cluster, UNHCR - Survey to determine the state of preparedness for the winter season of PwD and OP – November 2022 (link)
The survey was conducted during in-person meetings with respondents, or over the phone using a Google-form, during September 2022 covering 2,978 respondents all over Ukraine. The respondents were from two categories, older people (60+) and persons with disabilities from all over Ukraine.

- 34% live alone without family; 86% do not work and have no additional income. 14% have no support at all.
- The biggest winter concerns for 64% of older people and persons with disabilities is the inadequate amount of pensions/social benefits to meet their basic needs, with 61% concerned with price increases and insufficient/low income, which makes their future planning for winter impossible to achieve.
- The figures worsen if you select the most vulnerable groups, for example PwD aged 60+; Only 38% reported they are ready, and 62% of respondents reported they are not ready for the winter season.
- The question ‘What other needs do you have in terms of preparing for the winter period?’ (multiple choice question) was answered as follows: 72% specified they need cash assistance, 62% need medicines, 59% need food.
Child Protection

Save the Children - “This is my life, and I don’t want to waste a year of it”: The experiences and wellbeing of children fleeing Ukraine, November 2022 (link)

The impact of displacement on children’s wellbeing: Save the Children research with more than 1,000 children and caregivers in eight European countries, shows that children who have left Ukraine face significant challenges adjusting to their new environment. They report higher levels of anxiety and unhappiness than before, and a worryingly high proportion do not plan to enrol in or attend school.

Sub-national / Area-based assessments

HiA - Results of the humanitarian needs assessment in the Kharkiv region - Winter period – October 2022 (link)

HelpAge - Humanitarian needs of older men and women IDPs in Lviv and Lvivska oblast – November 2022 (link)
- 13% of older people reported that they had to borrow money to buy food or basic necessities.
- 99% of older people are experiencing various conflict-related psychological issues.

IOM - Collective Centre Assessment, Kyivska Oblast (link), Cherkaska Oblast (link) – Khmelnytska Oblast (link) - November 2022

Regional assessments

Joint EUAA, IOM and OECD Report – Forced displacement from and within Ukraine - Profiles, experiences and aspirations of affected populations - November 2022 (link)

The report is based on almost 4,000 responses from those displaced by the invasion, 71% of whom had completed University education.
- The large majority of respondents (82%) were women. 73% indicated having reached their preferred destination in Europe and noted that the main reasons for choosing their destination country were work opportunities (50%) or reuniting with friends and family members (47%).
- Most respondents to the survey had already registered for temporary protection (68%), while some registered for a national residence permit in their host country (11%) and a few applied for asylum (international protection) (2%).

UNHCR - Regional Protection Profiling & Monitoring: Profiles, Needs & Intentions of Refugees from Ukraine – November 2022 (link, link)

34,145 respondents from Poland, Moldova, Romania, Slovakia, Belarus, Hungary and Bulgaria.
- Cash is reportedly the most urgent need for 49% of respondents, followed by employment (36%) and accommodation (35%)
- 34% of Ukrainian refugees are in hosting accommodation, 32% in rented accommodation, and 14% in collective sites.
- 12% of respondents reported having one family member with a disability, 11% with a medical condition.

UNICEF - Ukraine Humanitarian Situation Report No. 18, (Refugee Response in Neighboring Countries) – November 2022 (link)

For the first time, UNICEF delivered Cash for Child Development and Education assistance in Slovakia, equivalent to US$117, per child (0 to 17 years) to support young children’s care, learning, and education opportunities.

Out of 4,296 submissions, the most commonly reported reasons why the population cannot leave were:

- Lack of resources to leave: 185
- Do not want to leave family behind: 171
- It is not safe to leave: 137
- Due to health issue or a disability: 135

60% of returnees reported that their area of their primary residence had been damaged by attacks or direct consequences of war.

50% of IDP respondents reported that their habitual residence was partially damaged or completely destroyed. 94% of them cited a lack of financial resources to cover the costs of repair as a key barrier to repair.

13% of IDPs indicated that they plan to return to their place of habitual residence in the upcoming two weeks, equivalent to 857,000 individuals.

13% of IDP respondents perceived tensions between themselves and the host community (13%). 76% of IDP respondents believe there is no competition for resources in their current location.

Key figures:
- Est. IDPs in Ukraine: 6,5M
- Est. returnees in Ukraine: 5,9M
- Est. displaced persons (non-displaced population only): 2,1M

1. Protection cluster - Protection monitoring highlights dashboard (link)
2. IOM - Ukraine Returns Report #2 (October 2022 (link)
**Reported needs in Ukraine, according to Ukrainians**

### Most commonly reported pressing needs

#### IDPs

- **Cash - Financial support**: 70%
- **Menstrual hygiene items**: 56%
- **Heating appliance**: 36%
- **Clothes, shoes, other NFIs**: 36%

#### Non IDPs

- **Cash - Financial support**: 59%
- **Menstrual hygiene items**: 41%
- **Solid fuel for heating**: 26%
- **Heating appliance**: 25%

#### Returnees

- **Cash - Financial support**: 59%
- **Menstrual hygiene items**: 30%
- **Heating appliance**: 27%
- **Building/ reconstruction mat.**: 21%

**Cash**, medicine and health services continue to be among the most pressing needs identified among all respondents. With decreasing temperatures, solid fuel is also an increasingly pressing need for many, with 12% of IDPs for instance reporting it.

### Most commonly reported needs 1st, 2nd and 3rd choices combined

### Findings from UNHCR MPCA PDM

61% of beneficiaries needed to resort to one or more harmful coping strategies in the four weeks preceding the interview to cover their most pressing needs. The most frequently adopted strategy was reducing expenditure on hygiene items, water, baby items, health, or education.

Besides humanitarian cash assistance, 45% of households receive cash assistance from the government. Another major source of income is pensions, received by 28% of the respondents. More than a third of the respondents (36%) used their savings to meet their basic needs.

### IDP and returnees income

- 24% of IDPs reported a monthly household income that is below the national minimum wage.
- 16% of returnee respondents reported household income which falls below the national subsistence level.
- 57% of returnee respondents aged 18-64 reported being employed or having own business as of October 27th.

**45%**

#### of respondents said that the aid they received did not fully meet the needs of their household. Most often it was due to the lack of sufficient assistance (64%), need for other types of products (59%) or assistance being not frequent enough (38%)

Most households spent money on food and beverages in the last 30 days prior to the interview, with the average of 941 PLN spent.

For HH outside of CC, rent was the largest expense, followed by food and beverages and childcare. For HH inside of CC, food and beverages, education, and childcare were top three expenses.

**945PLN**

- **24%** of respondent needs which indicates how important it is to provide a free childcare for refugee children to strengthen refugees’ livelihood capacities

- **46%** of households overall struggled to get enough money to meet their needs in the last 30 days prior to the interview. The language barrier was most often indicated as an obstacle to earning money, followed by the lack of relevant offers and low salary.

- The majority of households (69%) received social benefits from the Polish government, most often child allowance through the “Family 500 program” (received by 63% of households overall and outside of CC, and 69% of households inside of CC). 13% received unemployment allowance within a month of the interview.
- As their sources of income, families coming from Ukraine most often reported social benefits from the Polish government (55%) formal income in Poland (32%) and social benefits from Ukraine (26%).
- Banks were available in the immediate area of most respondents, and the majority (85%) was using them.

### Shelter situation

- Out of the refugees living outside of collective sites, half (50%) was renting flat or room and one third (30%) was hosted – either by locals (19%) or by friends/family (11%). One fifth (19%) lived in hotels/hotels.
- The average household monthly rent was 1,703 PLN (350 EUR, based on 563 answers).
- The average amount paid monthly for utilities (e.g., gas, electricity, media) was 414 PLN (85 EUR, based on 281 answers).

### Protection

- 17% of households experienced hostility from the host community (verbal aggression for 15%). Sense of security was high, however (91% of HHs felt very or somewhat safe walking alone in their neighborhoods).
- 77% of respondents outside of CC did not report any safety or security concerns for children in their neighborhood, 4 of respondents reported a risk of physical violence, and 4 worsened mental health or vulnerability.
- One-third (30%) of the refugees described their level of awareness of their rights and legal status in Poland as weak.
- Social services (e.g., social assistance centres) were most often available protection services in respondents’ area.
Key updates relevant to CVA & protection in Romania

**Funding environment**
UNHCR – 2022 funding update (link)¹ UNHCR's financial requirements 2022 - $147.4 million - 84% funded.

**General updates**
UNHCR Romania: Ukraine Refugee Situation Update, Update #21, 11 November 2022 (link) Previous updates (link, link)
89,011 refugees currently in Romania (as of 7 November 2022); 83,428 refugees registered for temporary protection in Romania (as of 7 November 2022). UNHCR has enrolled around 31,000 refugees for multipurpose cash assistance.
On 27 October, the first meeting of the Government Working Group on Protection from Sexual Exploitation and Abuse (PSEA) and Anti-Trafficking took place in Bucharest.

**CWG updates:**
All CWG partners implementing MPCA will collect a composition of identifiers to proceed with deduplication at this stage including: International passport ID number (when applicable), Ukrainian tax ID number, Temporary Protection ID number, Amount of Cash Assistance, Date of assistance. - UNHCR is finalising the Refugee Assistance Information System (RAIS) that will be used for the purpose of storing and deduplicating cash assistance. A data-sharing agreement (DSA) and SOPs are being finalized to set up and agree on the parameters of using this system. UNHCR is expected to conduct inductions on the deduplication process in 2w.

**Proposed Winterization Transfer Value:**
The proposed winterization transfer value of RON 1,959,00 per households (RON 653 per individual) is estimated based on the minimum electricity and natural gas usage per households accordingly to Romanian government’s emergency ordinance No. 277 to cap the electricity and natural gas prices for households to support consumers. The proposed transfer value has been presented to Cash Working and Basic Needs Working Groups.

**New assessments & guidance**
Results from 3,648 structured interviews with Ukrainians and third country nationals completed in 24 counties across Romania between the 8th of June and the 3rd of September.
- 27% of respondents are planning to return to Ukraine in the foreseeable future.
- 20% of respondents reported cash among their priority needs. (highest)
- 61% of respondents reported needing information about cash assistance.
- 38% of respondents prefer to receive information about humanitarian issues in-person

Roma Community

Oxfam - Roma refugees from Ukraine face Europe’s coming winter with added burden of hostility and discrimination (link) and Rapid needs assessment (link) - November 2022

The rapid assessment is based on the data collected from site observations, focus group discussions, key informant interviews, and individual interviews for personal stories of Roma refugees from Ukraine in Moldova in July 2022.

- The main challenges to accessing humanitarian assistance for Roma refugees in Moldova were identified by interviewees as: Segregation and discrimination in housing services; Lack of information, communication channels and complaints mechanisms; Lack of documentation
- Discussions with Roma refugees also highlighted key humanitarian needs which need to be urgently addressed for communities of Roma refugees in Moldova: Adequate shelter, including winterization and improved WASH facilities; Assistance with costs and meeting basic needs; Access to services in practice: healthcare and education; Recognizing and addressing gender specific needs.

Internews, IRC - Understanding the information ecosystem: Roma refugees in Moldova - September 2022 (link)

- Roma community is an important information source: Information sources that are most trusted and relied upon for Roma refugees are other Roma community members
- Trust is heavily influenced by the message carriers: The fact that the Roma community prefers to receive information from other Roma community members heavily influences the dynamics of trust in information and its providers
- Language and Literacy are a barrier: Members of the Roma refugee community, compared to the other refugees from Ukraine, have greater literacy difficulties.
Key updates relevant to CVA & protection in Moldova

Assessments

IOM - Ukraine Response - Republic of Moldova: Third Country Nationals (TCNs) Displacement Analysis – November 2022 (link)
- As of 30 October 2022, 7% (5,714 indiv.) of Ukrainian refugees are TCNs. Among TCNs, 55% were men, 29% were women and 16% were children.
- Among TCNs currently in the Republic of Moldova, the reported top countries of origin were Romania (36%), Russian Federation (16%), Azerbaijan (13%), Bulgaria (6%), Israel, Türkiye, Georgia and Georgia (3% each).

Gvt of Moldova, REACH, UNHCR - Moldova Refugee Accommodation Centre Weekly Needs Monitoring update – November 2022 (link)
- Out of 4991 total available places, 2153 are still free.
Top 3 RAC needs are Cleaning items 34%; Hygiene items 31%; Clothing items 30%.
- Requests for items increased in categories such as clothing, cleaning and hygiene. In preparation for winter, clothing needs increased by over 400% over a month.

Cold Spot Risk Assessment Winter 2022/23 as Cold spot Risk Index per Raion - REACH (link)

Raions with highest Cold Spot Index (CSI):
- Bohodukhivsky (CSI = 4.8)
- Kharkivsky (CSI = 4.8)
- Chuhuvs'kyi (CSI = 4.8)

Cold Spot Risk Assessment

Definition of ‘Cold Spots’:
Geographic areas where winter-related hazards (e.g., cold waves) compound with susceptibilities (e.g., internal displacement, elderly population, etc.) and Lack of Coping Capacity (LOCC), impacting vulnerable people most severely.

The ‘Cold Spot Index’ provides an indication in which raions people will likely face the highest, compounding impacts of exposure to winter-related hazards, and vulnerabilities (as combination of susceptibilities and LOCC) in winter 2022/23 in Ukraine.
